GENUINE NISSAN COLLISION PARTS

If you have an accident, insist on Genuine Nissan Collision Parts. If you want your vehicle to be restored using parts made to Nissan's original exacting specifications – if you want it to last, help to protect your personal safety and to help hold its resale value, the solution is simple. Tell your insurance agent and your repair shop to use only Genuine Nissan Collision Parts.

Many non-genuine parts are copies made from impressions of Nissan parts and may not match the specifications and performance standards of Genuine Nissan Parts. As a result, non-genuine parts may not look or fit right, and may be less safe.

The hood on your vehicle is a good example. Nissan designed it with hood buckling creases to help prevent the hood from penetrating the interior of your vehicle in an accident. Non-genuine parts may not provide such built-in safeguards.

In some states, the law says you must be advised if non-genuine parts are used to repair your vehicle. **Why should you take a chance?**

Replacement Panel Limited Lifetime Corrosion Warranty*

If you have your collision damage repaired using Genuine Nissan Outer Sheet Metal Panels you don't have to worry about corrosion. That's because these panels are warranted against inside out rust-through perforation for as long as you own your Nissan. Another reason to insist on Genuine Nissan Collision Repair Parts.

* This warranty does not apply to vehicles or parts not distributed by Nissan North America and/or sold outside the United States.

DETERMINING THE PROPER MAINTENANCE INTERVAL

As a condition of your vehicle's warranty, you are responsible for properly maintaining your vehicle. In maintaining your vehicle, you should use these guidelines to determine which maintenance schedule to use.

Standard maintenance; features 5,000 mile or 6 month, whichever comes first, service intervals and generally applies when you primarily operate your vehicle on the highway in temperate conditions. Premium maintenance is a Nissan recommended optional upgrade that adds services when maintenance is performed.

Exceptions:

1. Use of E85 in a Titan or Armada FFV (flex fuel vehicle) requires engine oil and filter replacement every 3,750 miles or 3 months.
2. NV200 Taxi requires engine oil and filter replacement every 3,750 miles or 3 months.

Premium Maintenance;* performing the Premium upgrade services may optimize the performance, durability, reliability, and resale value of your vehicle. (Premium Maintenance items are available at every 30,000 miles or 36 months interval.)

Additional maintenance items for severe operating conditions; should be performed on vehicles that are driven under especially demanding conditions. Additional maintenance items should be performed if you primarily operate your vehicle under the following conditions:

- Repeated short trips of less than 5 miles in normal temperatures or less than 10 miles in freezing temperatures.
- Stop-and-go traffic in hot weather or low speed driving for long distances
- Driving in dusty conditions or on rough, muddy, or salt-spread roads
- Towing a trailer, or using a camper or car-top carrier

For the ultimate in preventative maintenance, ask your Service Advisor for a complimentary Multi-Point Inspection every time you visit your participating Nissan dealer. See page 16 for more information on Multi-Point Inspections.

* Premium Maintenance is a Nissan-recommended option; You need not perform such maintenance in order to maintain the warranties which come with your Nissan. Premium Maintenance may not be available outside the United States, please inquire of your dealer.

EXPLANATION OF SCHEDULED MAINTENANCE ITEMS

The following descriptions are provided to give you a better understanding of the scheduled maintenance items that should be regularly checked or replaced. The maintenance log indicates at which mileage/time intervals each item requires service.

In addition to scheduled maintenance, your Nissan requires that some items be checked during normal day-to-day operation. You can find these items listed under “General Maintenance” in Chapter 8 of your Owner’s Manual.

Items marked with “**” are recommended by Nissan for reliable vehicle operation. You are not required to perform maintenance on these items in order to maintain the warranties which come with your Nissan. Other maintenance items and intervals are required.

When applicable, additional information can be found in the “Maintenance and do-it-yourself” section in Chapter 8 of your Owner’s Manual.

NOTE: Nissan does not advocate the use of non-OEM approved aftermarket flushing systems and strongly advises against performing these services on a Nissan product. Many of the aftermarket flushing systems use non-OEM approved chemicals or solvents, the use of which has not been validated by Nissan.

For recommended fuel, lubricants, fluids, grease, and refrigerant, refer to Chapter 9 in your Owner’s Manual.

Emission Control System Maintenance:

Drive Belts*

Check engine drive belts for wear, fraying or cracking and for proper tension. Replace any damaged drive belts.

Engine Coolant*

Replace coolant at the specified interval. When adding or replacing coolant, be sure to use only Genuine Nissan Long Life Antifreeze/Coolant (Blue) or equivalent with the proper mixture. The recommended service interval of the factory-fill coolant is 105,000 miles (168,000 km) or 7 years, whichever comes first.

Subsequent replacement of Genuine Nissan Long Life Antifreeze/Coolant (Blue) should occur every 75,000 miles (120,000 km) or 5 years whichever comes first.

NOTE: Mixing any other type of coolant or the use of non-distilled water will reduce the recommended service interval of the coolant.

EXPLANATION OF SCHEDULED MAINTENANCE ITEMS

Hybrid Electronic Vehicle (HEV) Inverter Coolant

Replace inverter coolant at the specified interval. The recommended service interval of the factory-fill coolant is 125,000 miles (200,000 km) or 15 years, whichever comes first. Subsequent replacement of Genuine Nissan Long Life Antifreeze/Coolant (Blue) should occur every 75,000 miles (120,000 km) or 5 years, whichever comes first. When adding or replacing coolant, be sure to use only Genuine Nissan Long Life Antifreeze/Coolant (Blue) or equivalent with the proper mixture. (Refer to the Owner's Manual to determine the proper mixture for your area.)

NOTE: Mixing any other type of coolant or the use of non-distilled water will reduce the recommended service interval of the coolant.

Replace engine oil and oil filter at the specified intervals. For recommended oil grade and viscosity refer to Chapter 9 in your Owner's Manual.
